

ABSTRACT

A resin microparticle for a toner raw material that has a small particle diameter and a narrow particle diameter distribution and has a low odor is provided. The resin microparticle for a toner raw material has the following requirements (i) to (iii) satisfied:

Requirement (i): A particle diameter of 50% volume (D50) satisfies the relationship $0.05 \mu\text{m} \leq D50 \leq 1 \mu\text{m}$;

Requirement (ii): A particle diameter of 10% volume (D10) and a particle diameter of 90% volume (D90) satisfy the relationship $D90/D10 \leq 7$; and

Requirement (iii): The content of an organic solvent is not more than 70 ppm.
